

The 5th EADC International Symposium on Co-existence of Environment and Dams TABLE OF CONTENTS

GUEST SPEECH

SPECIAL REPORT

Main Topic : Co-existence of Environment and Dams

Sub Topic-1 : Effective Use of Existing Dams

Sub Topic-2 : Recent Technical Progress on High Dams

GUEST SPEECH

World Water Resources and Dams in the 21st Century

Japan

Co-existence of Dams and the Environment

USA

SPECIAL REPORT

1 Preliminary Investigation of Dams Stricken by the Iwate-miyagi Nairiku Earthquake in 2008

Japan

2 Performance of Zipingpu CFRD during the strong earthquake

China

Main Topic : Co-existence of Environment and Dams

- | | | |
|----|--|----------|
| 1 | Actions to Conserve the Environment at Oyama Dam | Japan |
| 2 | Effective Countermeasures to Long-term Turbid Water Effluence from Hitotsuse Reservoir | Japan |
| 3 | Turbid Water Treatment in a Reservoir Using Natural Coagulant | Japan |
| 4 | Present Status of Water Quality in Japanese Dam Lakes and Water Quality Preservation Measures | Japan |
| 5 | Improvement of Dams to Discharge River Maintenance Flow | Japan |
| 6 | Kyushu Electric's Actions Towards Biodiversity Conservation in Dam Construction for a Large-scale Pumped Storage Hydroelectric Power Station | Japan |
| 7 | The Outline of Environmental Preservation Measures in the Taiho Dam Construction Project | Japan |
| 8 | A Clear Water Bypass Pipeline System Mitigates Turbid Water Discharge From a Dam | Japan |
| 9 | Renovated Program for Supporting Local Residents Living in Dam Surrounding Areas | Korea |
| 10 | Conflict Management for the Construction of Hantangang Dam | Korea |
| 11 | A Study on the Sandbar and Vegetation Areas Alteration at the Downstream of Dam | Korea |
| 12 | The Estimation of Turbid-water Occurrence Possibility in Basins for the Environmental Improvement of Dam Reservoirs | Korea |
| 13 | The Environmentally-Friendly Improvement Project of Dam Area | Korea |
| 14 | The Research on Ecological Environment Protection in Three Gorges Dam and Reservoir Area | China |
| 15 | Experimental Study on the Layout and River Regime of the Intake of Water Environment Compensating Project from Yangtze River to Hanjiang River About South to North Water Transfer | China |
| 16 | Research on Hydraulic method of Urban River re-aeration restoring | China |
| 17 | Comprehensive improvement countermeasures of floating debris for cascade reservoirs of Three Gorges | China |
| 18 | By Breaching Through Ideas And Innovating Technique, Constrtcting A Project With Both Nature And Society In Harmony | China |
| 19 | Construction and Empirical Study of Risk Endurance Model of Residents in Reservoir Downstream | China |
| 20 | Evaluation on the effect of dam engineering to atmospheric ecosystem | China |
| 21 | The Socio-economic Impacts from the Environmental Changes after the Construction of Sirikit Dam | Thailand |
| 22 | A Review of the Question of Hydropower Generation and Greenhouse Gas Emissions | Brazil |

Sub Topic-1 : Effective Use of Existing Dams

23	Rehabilitation of an Old Concrete Gravity Dam and its Countermeasures for Environmental Preservation	Japan
24	Sediment Countermeasures at Dams Constructed on Rivers with Heavy Sediment Discharge	Japan
25	Engineering for Raising Dams in Japan	Japan
26	The Enhancement of the Flood Control Capacity by the Construction of Emergency Spillway(Andong Dam)	Korea
27	Interdisciplinary Research for Pre-prevention Measures for Turbid Water with Watershed Units	Korea
28	Statistical Tests of the Flow Change after Dam Construction	Korea
29	Improvement of the Existing Dam to Control the PMF	Korea
30	Examination on the Effect of Dam Flush Release for Environmental Improvement in Downstream Area of Dam	Korea
31	Sediment Monitoring and Modeling Practice of Three Gorges Project in Changjiang River	China
32	Research on Reservoir Sedimentation of Baihetan Hydropower Station on Jinsha River	China
33	Study on Sediment Problems at the Fluctuating Backwater Area of Three Gorges Reservoir	China
34	Stability Analysis of the Scour Funnel in front of the Flood and Sediment Discharge Tunnel of the Guanting Reservoir	China
35	Raise the Efficiency of Sediment Diversion by Density Flow, Extend the Life of Xiaolangdi Reservoir	China
36	Management System Development of Dangerous Reservoirs in China & Preliminary Statistics Analysis of Distress Causes	China
37	Feasibility Study of Installing EGAT In-house Micro hydro bulb Turbine at Huai Kum Dam drain pipeline	Thailand

Sub Topic-2 : Recent Technical Progress on High Dams

38	Trapezoidal CSG Dams	Japan
39	Case Study of the Construction of Embankment Copper Dam by Using Synthetic Filter Mat in an Existing Reservoir during the Normal Operation	Korea
40	Control of Extreme Flood that Exceeded the Design of Namgang Dam in 2006	Korea
41	Research on Structural jointing & Temperature Control For Gravity Dam of Xiangjiaba Hydropower Station	China
42	Influence of Sedimentation Accumulated in Front of Xiaolangdi Dam on Foundation Seepage of Dam	China
43	Treatment of Wastewater from Sand and Aggregate Processing Systems in Longtan Hydropower Station	China
44	Chemical Grouting Trial on Jinping-I Hydropower Project	China
45	Application of the Centralized Charge Chamber Technique in Directional Blasting Demolition of the RCC Cofferdam in the Third Phase of the Three Gorges Project	China
46	Technology and Benefits of the Hydrological Information Telemetry System on the Jinsha River	China
47	Concept and practice of high performance concrete for dams	China
48	Research of great type reservoir storage calculation method based on the spatial information technology	China
49	To anticipate flood in basins that is lacked of statistics with use of regression table and artificial-nervous networks [Case study-southern basins in Caspian lake]	Iran
